

'A song about finding that special someone in your life...shit happens too:-)
Hendrik Thiesbrummel-Drums, all other instruments and vocals by WZ'

IT'S TRUE

So many times I had to stand alone
With not even a friend to call on the telephone
No mans an island and it just couldn't last
I felt your love come in and heal my past

You changed my life
And made me whole
You took me in when the night was cold
And here I am and it feels so good
I'm lost in your love

And it's true, yes its true
All my life I been searching for someone like you
And my world is spinning round and round
I don't ever want to come down

Sometimes the rain pours down over me
Cover me with all your love so tenderly
And when the morning sun comes up with a smile
You take me in your arms for a little while

You changed my life
And made me whole
You took me in when the night was cold
Now here I am and it feels so good
I'm lost in your love

And it's true, yes it's true
All my life I been searching for someone like you
And my world is spinning round around
I don't ever want to come down
